

<b>Table 26.6.</b> Normal Probability Function—Values of $x$ for Extreme Values of $P(x)$ and $Q(x)$ . . . . .	Page 977
$Q(x)=0(.0001).025, 5D$	
$Q(x)=10^{-m}, m=4(1)23, 5D$	
<b>Table 26.7.</b> Probability Integral of $\chi^2$ -Distribution, Incomplete Gamma Function, Cumulative Sums of the Poisson Distribution . . . . .	978
$\chi^2=.001(.001).01(.01).1(.1)2(.2)10(.5)20(1)40(2)76$	
$\nu=1(1)30, 5D$	
<b>Table 26.8.</b> Percentage Points of the $\chi^2$ -Distribution—Values of $\chi^2$ in Terms of $Q$ and $\nu$ . . . . .	984
$Q(\chi^2 \nu)=.995, .99, .975, .95, .9, .75, .5, .25, .1, .05, .025, .01, .005, .001, .0005, .0001$	
$\nu=1(1)30(10)100, 5-6S$	
<b>Table 26.9.</b> Percentage Points of the $F$ -Distribution—Values of $F$ in Terms of $Q, \nu_1, \nu_2$ . . . . .	986
$Q(F \nu_1, \nu_2)=.5, .25, .1, .05, .025, .01, .005, .001$	
$\nu_1=1(1)6, 8, 12, 15, 20, 30, 60, \infty$	
$\nu_2=1(1)30, 40, 60, 120, \infty, 3-5S$	
<b>Table 26.10.</b> Percentage Points of the $t$ -Distribution—Values of $t$ in Terms of $A$ and $\nu$ . . . . .	990
$A(t \nu)=.2, .5, .8, .9, .95, .98, .99, .995, .998, .999, .9999, .99999, .999999$	
$\nu=1(1)30, 40, 60, 120, \infty, 3D$	
<b>Table 26.11.</b> 2500 Five Digit Random Numbers . . . . .	991

The authors gratefully acknowledge the assistance of David S. Liepman in the preparation and checking of the tables and graphs and the many helpful comments received from members of the Committee on Mathematical Tables of the Institute of Mathematical Statistics.
